Geography A

PAPER 1: The Physical Environment

You must have:

Resource booklet (enclosed), calculator

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- In Section A answer Question 1 and **two** questions from Questions 2, 3 and 4.
- In Section B and Section C answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- Where asked you must **show all your working out** with **your answer clearly identified at the end of your solution.**

Information

- The total mark for this paper is 94.
- The marks for **each** question are shown in brackets
 - *use this as a guide as to how much time to spend on each question.*
- The marks available for spelling, punctuation and grammar are clearly indicated.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A**The Changing Landscapes of the UK****Answer ALL parts of Question 1. Write your answers in the spaces provided.****Some questions must be answered with a cross in a box . If you change your mind about an answer, put a line through the box and then mark your new answer with a cross .**

1 UK landscapes are constantly being changed by different processes.

(a) Name **one** type of metamorphic rock.

(1)

(b) State **one** characteristic of a sedimentary rock.

(1)

(c) Explain **one** reason why igneous rocks often have large crystals.

(2)

(d) Study Figure 1a in the Resource Booklet.

Figure 1b below is a cross section from 750586 to 790586.

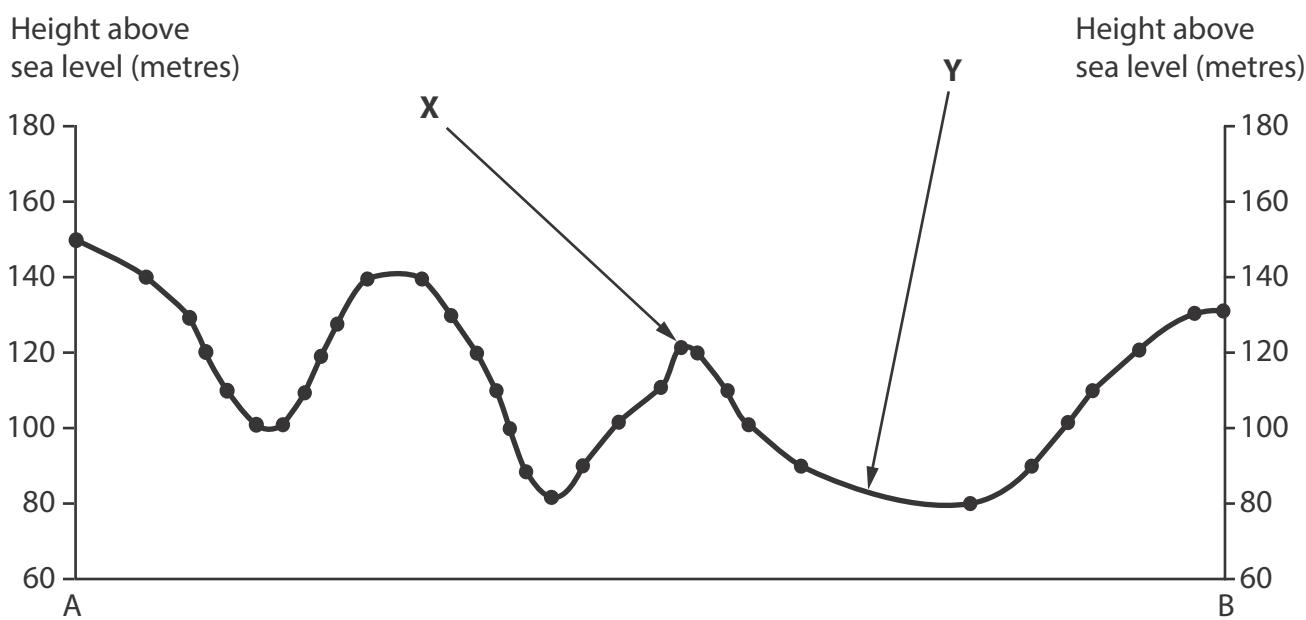

Figure 1b

(i) Identify the land use at X.

(1)

- A** buildings
- B** railway
- C** woodland
- D** youth hostel

(ii) Identify the settlement at Y.

(1)

(Total for Question 1 = 6 marks)

Answer only TWO questions from Question 2 (Coastal Landscapes and Processes), Question 3 (River Landscapes and Processes) and Question 4 (Glaciated Upland Landscapes and Processes).

Question 2: Coastal Landscapes and Processes

If you answer Question 2 put a cross in the box .

2 Coastal landscapes are constantly being changed by physical processes.

(a) Study Figure 2a in the Resource Booklet.

Identify the landform shown in Figure 2a.

(1)

- A** arch
- B** beach
- C** spit
- D** stack

(b) State **one** type of mass movement process.

(1)

(c) Explain **one** way that constructive waves can affect beaches.

(2)

(d) Study Figure 2b in the Resource Booklet.

Examine how different physical processes and human activities may have affected the rates of erosion shown in Figure 2b.

(8)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

(Total for Question 2 = 12 marks)

Question 3: River Landscapes and Processes.**If you answer Question 3 put a cross in the box .**

3 River landscapes are constantly being changed by physical processes.

(a) Study Figure 3a in the Resource Booklet.

Identify landform **Y**.

(1)

- A** flood plain
- B** gorge
- C** interlocking spurs
- D** oxbow lake

(b) State **one** type of sediment transportation process.

(1)

(c) Explain **one** reason why sediment size usually decreases downstream.

(2)

P 7 0 8 3 9 A 0 7 2 8

(d) Study Figures 3b and 3c in the Resource Booklet.

Examine the role of erosion processes and geology in the formation of the waterfalls and gorge shown in Figures 3b and 3c.

(8)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

(Total for Question 3 = 12 marks)

P 7 0 8 3 9 A 0 9 2 8

Question 4: Glaciated Upland Landscapes and Processes

If you answer Question 4 put a cross in the box .

4 Glaciated upland landscapes are constantly being changed by physical processes.

(a) Study Figure 4a in the Resource Booklet.

Identify landform Z.

(1)

- A arête
- B corrie
- C drumlin
- D truncated spur

(b) State **one** type of glacial erosion process.

(1)

(c) Explain **one** impact of freeze thaw weathering on landscapes.

(2)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

(d) Study Figures 4b and 4c in the Resource Booklet.

Examine the role of erosional processes in the formation of the glacial trough shown in Figures 4b and 4c.

(8)

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

(Total for Question 4 = 12 marks)

TOTAL FOR SECTION A = 30 MARKS

SECTION B**Weather Hazards and Climate Change**

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box \boxtimes . If you change your mind about an answer, put a line through the box \boxtimes and then mark your new answer with a cross \boxtimes .

5 Some locations are more vulnerable to drought than others.

(a) Study Figure 5a in the Resource Booklet.

(i) Identify the year that the rainfall was furthest below the mean.

(1)

- A 1955
- B 1968
- C 1984
- D 2003

(ii) Calculate the range of the rainfall between 1990 and 2015.

Answer to **one** decimal place.

You must show your working in the space below.

(2)

..... cm / month

P 7 0 8 3 9 A 0 1 3 2 8

(b) Study Figure 5b in the Resource Booklet.

Explain **one** impact of drought on people and **one** impact on the environment in South east Australia.

You must use evidence from Figure 5b in your answer.

(4)

People

Environment

(Total for Question 5 = 7 marks)

6 The atmosphere operates as a global system transferring heat and energy.

(a) Name **one** of the global atmospheric circulation cells.

(1)

(b) Study Figure 6a in the Resource Booklet.

(i) Identify the amount of solar energy received (kWh/m^2) per day at **X**.

(1)

- A** 2.2–2.9
- B** 3.8–4.5
- C** 5.4–6.1
- D** 6.2–6.9

(ii) Explain **one** reason why location **X** receives a different amount of solar energy than location **Y**.

You must use evidence from Figure 6a in your answer.

(3)

(c) Explain **one** meteorological cause of drought.

(3)

(d) Tropical cyclones (hurricanes and typhoons) develop under specific conditions and in certain locations.

Study Figure 6b in the Resource Booklet.

(i) Identify which **one** of the following dates had the strongest wind speeds.

(1)

- A** 12 Sept
- B** 14 Sept
- C** 16 Sept
- D** 18 Sept

(ii) Calculate the total distance travelled by Typhoon Ompong between 12–18 September 2018.

Answer to **one** decimal place.

You must show your working in the space below.

(2)

..... km

(e) Study Figure 6c in the Resource Booklet.

(i) Identify the year with the highest number of tropical cyclones.

(1)

(ii) Suggest **one** reason for the overall change in the frequency of tropical cyclones between 1970 and 2020.

You must use evidence from Figure 6c in your answer.

(3)

P 7 0 8 3 9 A 0 1 7 2 8

(f) Evaluate the following statement.

Human activity is the main cause of global climate change.

(8)

TOTAL FOR SECTION B = 30 MARKS

P 7 0 8 3 9 A 0 1 9 2 8

SECTION C**Ecosystems, Biodiversity and Management**

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box . If you change your mind about an answer, put a line through the box and then mark your new answer with a cross .

**Spelling, punctuation, grammar and specialist terminology
will be assessed in Question 7(h).**

7 Large-scale ecosystems are found in different parts of the world.

(a) Study Figure 7a in the Resource Booklet.

Identify which **one** of the following describes the climate in the tundra ecosystem.

(1)

- A Low precipitation and high temperatures
- B High precipitation and low temperatures
- C Low precipitation and low temperatures
- D High precipitation and high temperatures

(b) Explain **one** way that altitude may affect the distribution of the temperate forest ecosystem.

(2)

(c) Marine ecosystems in the UK are an important resource.

Study Figure 7b below.

Seven main fish species caught	Weight of fish caught (tonnes)
Mackerel	152 100
Herring	75 500
Blue whiting	60 800
Haddock	33 800
Cod	29 000
Monkfish	17 700
Saithe	15 300
Total catch	384 200

Figure 7b

Seven main fish species caught by UK vessels in 2019

(i) Calculate the weight of cod caught as a percentage of the total catch.

Answer to **one** decimal place.

You must show your working in the space below.

(2)

.....%

P 7 0 8 3 9 A 0 2 1 2 8

(ii) Explain **one** way humans have damaged marine ecosystems.

(2)

(d) Name **one** of the main terrestrial ecosystems in the UK.

(1)

(e) Study Figure 7c in the Resource Booklet.

Suggest **one** way that the vegetation shown in Figure 7c has adapted to the tropical rainforest environment.

You must use evidence from Figure 7c in your answer.

(3)

(f) Explain **two** ways that climate change is a threat to the biodiversity of tropical rainforests.

(g) Deciduous woodlands show a range of distinguishing features.

Study Figures 7d and 7e below.

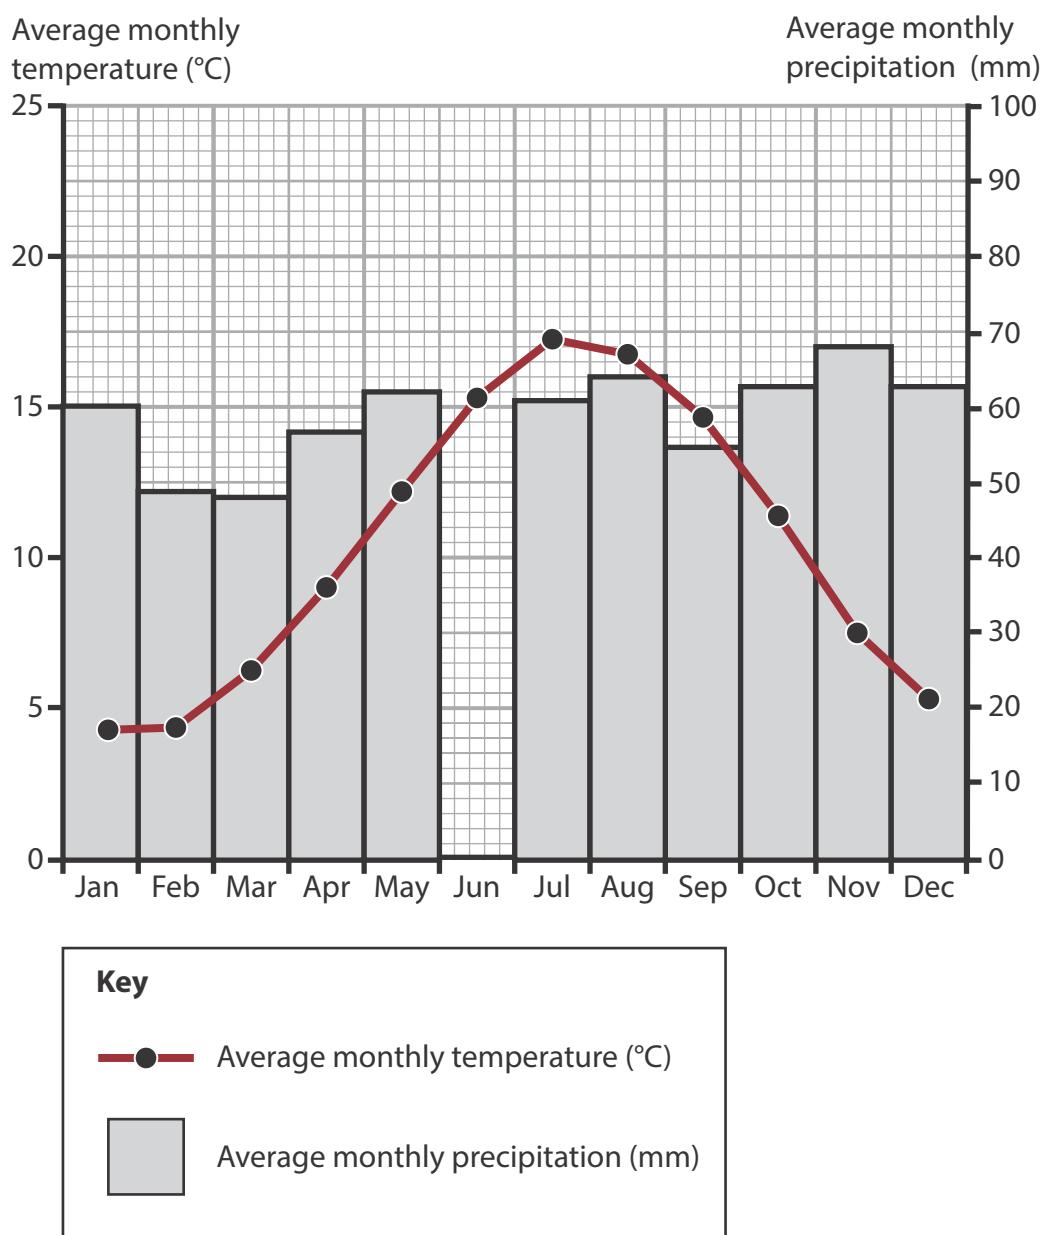

Figure 7d

Climate graph for an area of deciduous woodland in the UK

	Jan	Feb	Mar	Apr	May	June	Jul	Aug	Sept	Oct	Nov	Dec
Average monthly temperature (°C)	4.6	4.7	6.4	9.0	12.3	15.3	17.3	16.8	14.6	11.4	7.5	5.3
Average monthly precipitation (mm)	60	49	48	57	62	60	61	64	55	63	68	63

Figure 7e

Data for the climate graph shown in Figure 7d

(i) Plot the June precipitation total on Figure 7d.

(1)

(ii) Calculate the mean of the average monthly temperatures shown in Figure 7e.

Answer to **one** decimal place.

You must show your working in the space below.

(2)

..... °C

P 7 0 8 3 9 A 0 2 5 2 8

(iii) Explain **two** ways that deciduous woodland ecosystems can provide goods and services.

SECTION A

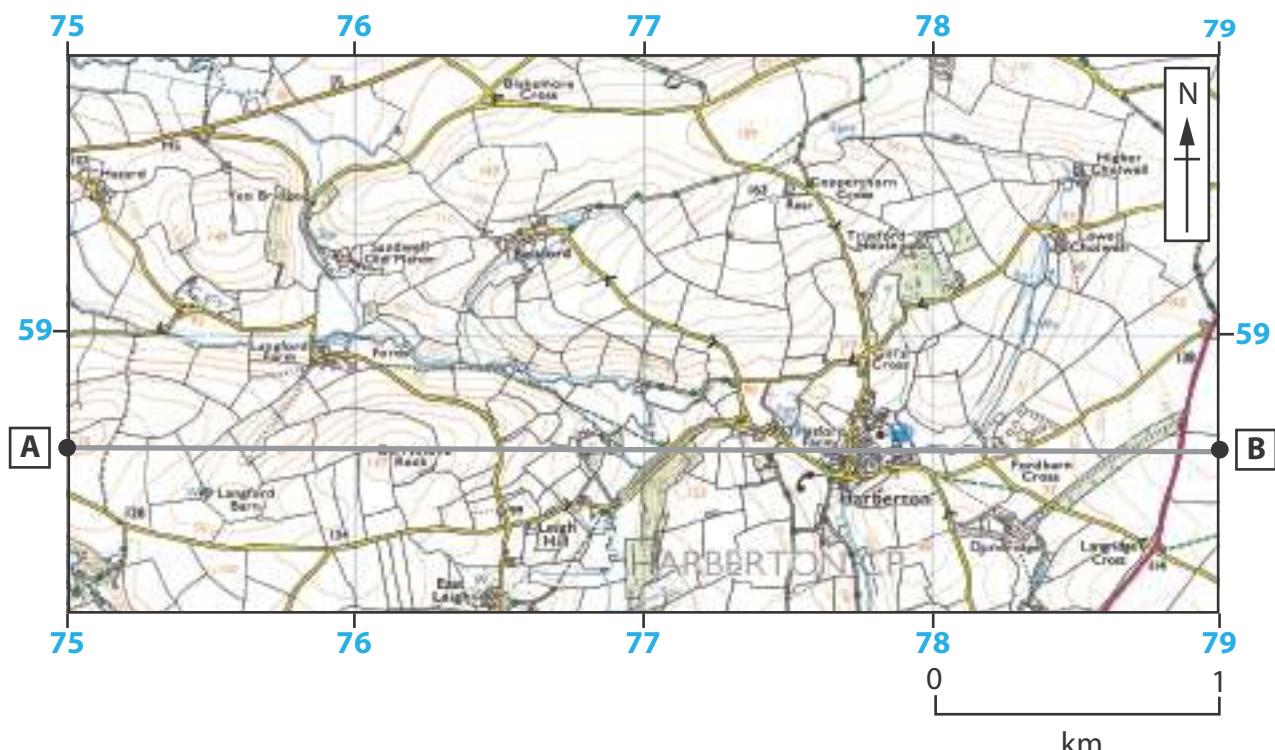

Figure 1a
An area in Devon, England

Key for Figure 1a

HEIGHTS AND NATURAL FEATURES

52 - Ground survey height

284 - Air survey height

Surface heights are to the nearest metre above mean sea level. Where two heights are shown, the first height is to the base of the triangulation pillar and the second (in brackets) to the highest natural point of the hill.

VEGETATION

Vegetation limits are defined by positioning of symbols

Coniferous trees

Non-coniferous trees

Coppice

Vertical face/cliff

Boulders Loose rock Outcrop Scree

Water; mud

Sand; sand and shingle

Key for Figure 1a continued

GENERAL FEATURES

- Building; important building
- Glasshouse
- Youth hostel
- Bunkhouse / camping barn / other hostel
- Bus or coach station

ROADS AND PATHS Not necessarily rights of way

-  Main road
-  Road generally less than 4 m wide

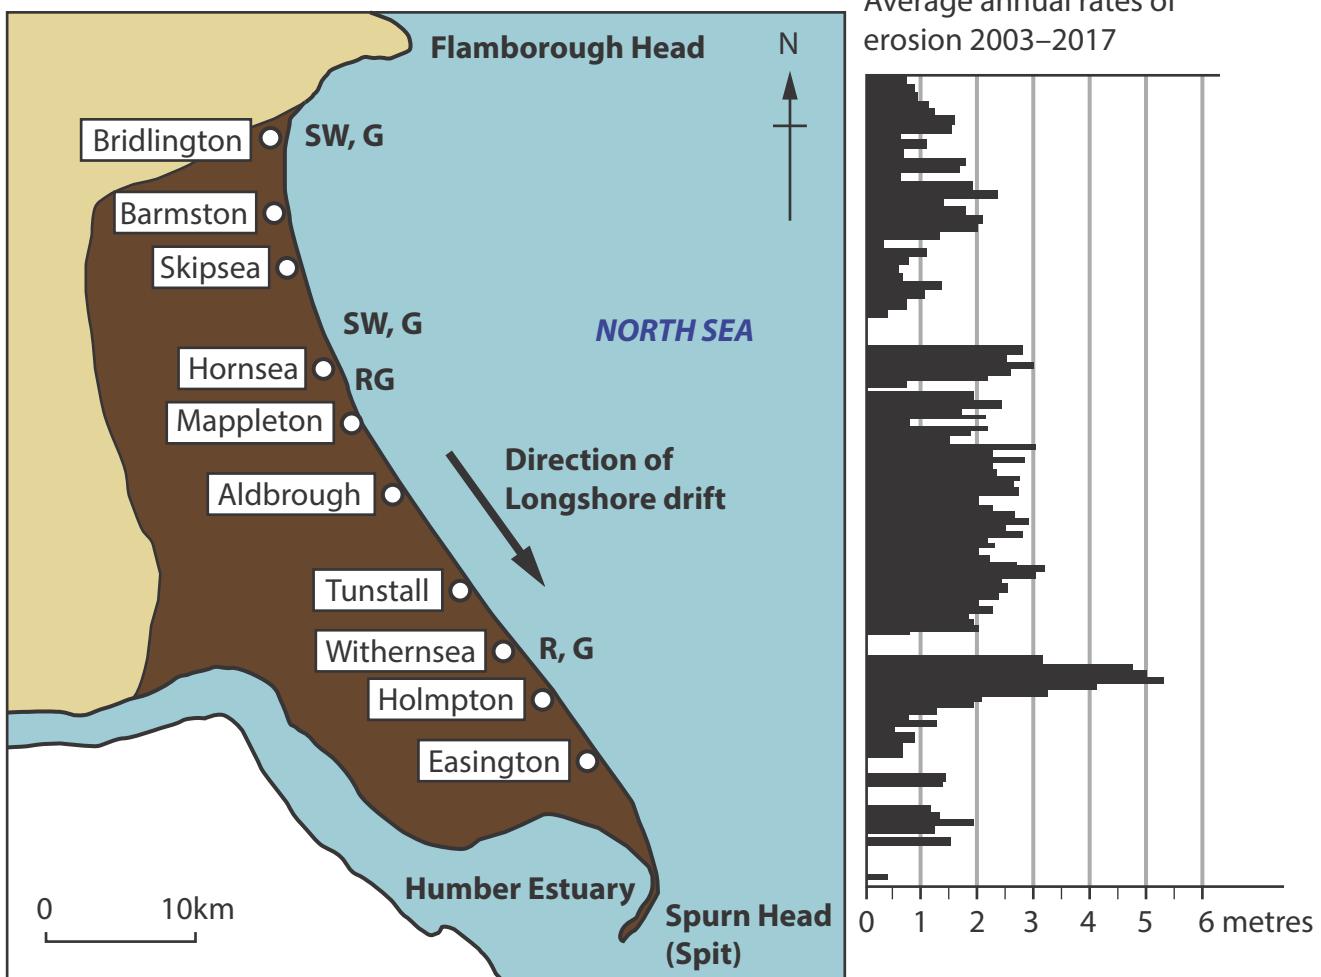

Railway

-  Multiple track
-  Single track
-  Standard gauge

Figure 2a
Durdle Door, Dorset, England

Key

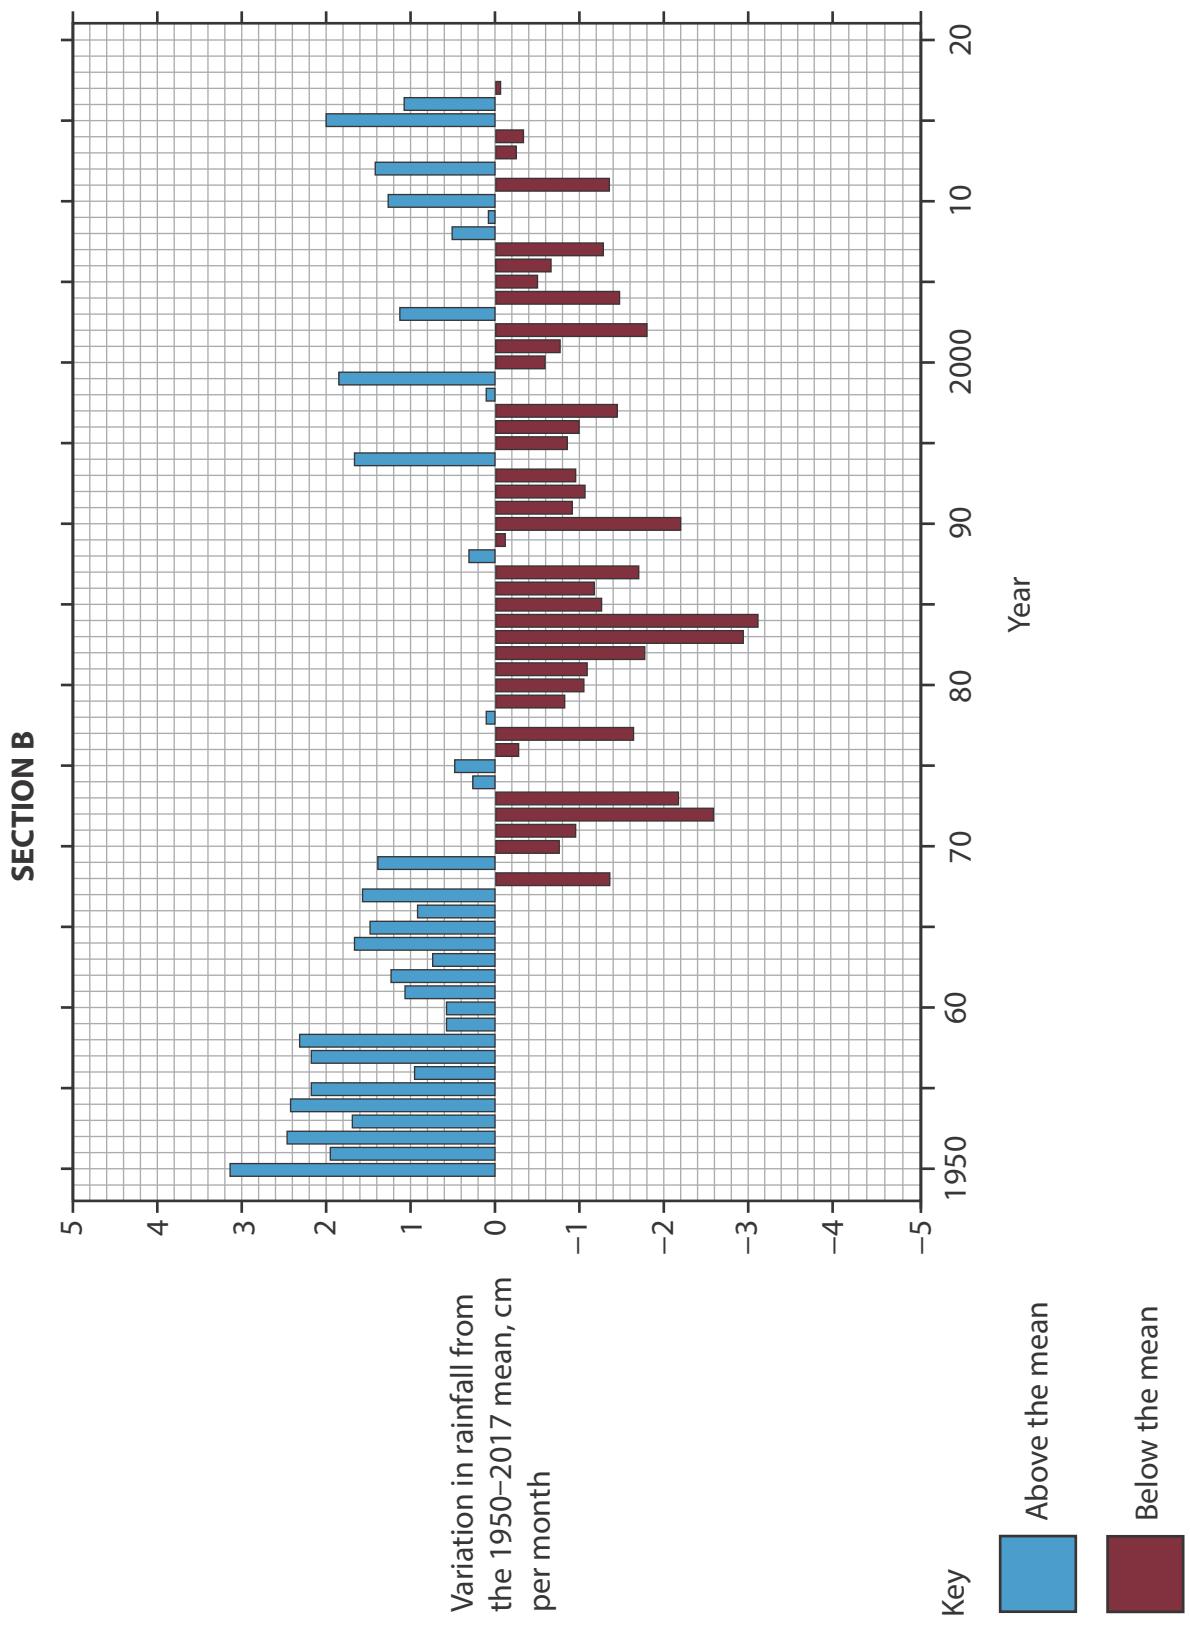

Figure 5a
Variations in annual rainfall in the Sahel region of Africa, 1950–2017

South east Australia was affected by a major drought.

Farmers had to provide emergency food for their animals.

There were 15 months of below mean rainfall.

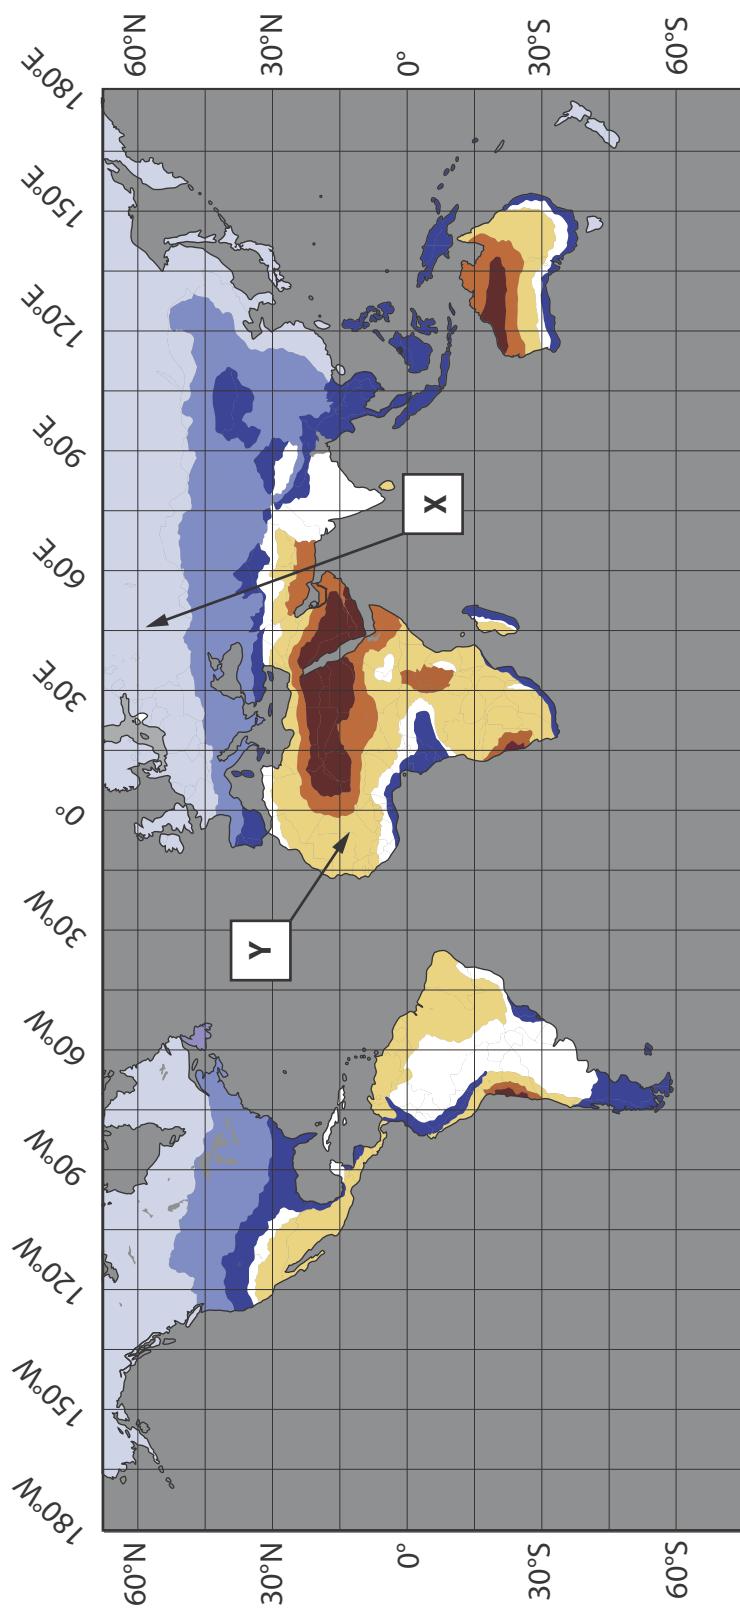

Many trees in the area died.

The incomes of many farmers fell.

Many farmers became physically and mentally ill.

Figure 5b

Impacts of drought in South east Australia in 2018–2019
