

# Mark Scheme (Results)

November 2023

Pearson Edexcel International GCSE  
In Geography (4GE1)  
Paper 02: Human Geography

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

## **Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## **Marking guidance for levels-based mark schemes**

### **How to award marks**

The indicative content provides examples of how students will meet each skill assessed in the question. The levels descriptors and indicative content reflect the relative weighting of each skill within each mark band.

### **Finding the right level**

The first stage is to decide which level the answer should be placed in. To do this, use a 'best-fit' approach, deciding which level most closely describes the quality of the answer. Answers can display characteristics from more than one level, and where this happens, markers must use the guidance below and their professional judgement to decide which level is most appropriate.

### **Placing a mark within a level**

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance. Statements relating to the treatment of students who do not fully meet the requirements of the question are also shown in the indicative content section of each levels-based mark scheme. These statements should be considered alongside the levels descriptors.

Markers should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Markers should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the answer meets the requirements of the level:

- if it meets the requirements fully, markers should be prepared to award full marks within the level. The top mark in the level is used for answers that are as good as can realistically be expected within that level
- if it only barely meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for answers that are the weakest that can be expected within that level
- the middle marks of the level are used for answers that have a reasonable match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

Question number	Answer	Mark
<b>1(a)(i)</b>	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>D Access to road network. (1)</p> <p>The answer cannot be A, B or C as these are not factors which affect the location of primary industry.</p>	<b>(1)</b>

Question number	Answer	Mark
<b>1(a)(ii)</b>	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>Award 1 mark for suitable example:</p> <ul style="list-style-type: none"> <li>• Research &amp; development / universities (1).</li> <li>• Artificial intelligence (1).</li> <li>• 3D printing (1)</li> <li>• Computing / ICT (1)</li> <li>• Robotics (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(1)</b>

Question number	Answer	Mark
<b>1(b)</b>	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>A ageing rural populations (1)</p> <p>It cannot be B, C or D as these are not impacts of a shift from primary secondary industries</p>	<b>(1)</b>

Question number	Answer	Mark
<b>1(c)</b>	<p style="text-align: center;"><b>AO2 (1 mark) / AO3 (1 mark)</b></p> <p>Award 1 mark for basic evidence from the from the figure (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> <li>• Tertiary/services sector largest in USA (1) as industries have declined (1).</li> <li>• Peru has a mix of sectors with the largest being services (1) as they begun to move beyond industrialisation (1).</li> <li>• Large primary/agricultural sector in Zimbabwe (1) as economy relies largely on agricultural output (1).</li> </ul>	<b>(2)</b>

	<ul style="list-style-type: none"> <li>Different levels of primary sectors (1) due to different stages of industrialisation (1).</li> </ul> <p>Accept any other appropriate response.</p>	
--	---	--

Question number	Answer	Mark
<b>1(d)</b>	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>Award 1 mark for a suitable response which related to features of the Clark-Fisher model on changing employment structure.</p> <ul style="list-style-type: none"> <li>Change in employment/economic sector (1)</li> <li>Change in employment over time (1)</li> <li>Employment through industrialisation (1)</li> </ul> <p>Accept any other reasonable response.</p>	<b>(1)</b>

Question number	Answer	Mark
<b>1(e)</b>	<p style="text-align: center;"><b>AO2 (2+2 marks)</b></p> <p>Award 1 mark for an advantage or disadvantage and a further expansion mark, up to a maximum of 2 marks each. Maximum 2 marks for an advantage or disadvantage.</p> <p>Range of named megacities could be chosen, for example: Delhi, Shanghai, Sao Paulo, Dhaka, Cairo, Beijing. Mexico City, Istanbul, Karachi.</p> <p>Advantages:</p> <ul style="list-style-type: none"> <li>Allows people to access some form of employment (1) which can allow people to feed their families/maintain some quality of life (1).</li> <li>Some employers pay well (1) because they are not paying taxes themselves (1).</li> <li>Usually a closer relationship with the employer (1) which may make it easier to get time off if needed (1).</li> </ul> <p>Disadvantages:</p> <ul style="list-style-type: none"> <li>Work is usually unregulated (1) which means they could be at more risk of accident or injuries (1).</li> <li>Work is often low paid (1) and therefore they may not earn enough to support their families (1)</li> <li>Little job security (1) as there is usually no contract (1).</li> <li>Can sometimes involve child labour (1) which means they do not spend the time in education (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(4)</b>

Question number	Answer	Mark
<b>1(f)</b>	<p style="text-align: center;"><b>AO1 (1 mark) / (AO3) 2 marks</b></p> <p>Award 1 mark (AO1) for basic point about difference in consumption, or specific data for individual country, and a further 2 marks (AO3) for extension through use of the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> <li>• Higher demand in northern Europe (1) may be due to temperatures experienced (1) so energy demand may be higher to heat business and homes (1).</li> <li>• Demand may be higher in eastern European countries (1) as there may be more industrial processes taking place here (1) which are energy intensive (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(3)</b>

Question number	Answer	Mark
<b>1(g)</b>	<p style="text-align: center;"><b>AO2 (2+2 marks)</b></p> <p>Award 1 mark for each environmental impact and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> <li>• Using non-renewable energy source such as coal can increase carbon emissions (1) which can contribute to climate change (1).</li> <li>• Mining for non-renewable sources can lead to land degradation (1) which can damage habitats for local biodiversity (1).</li> <li>• Extraction of oil can lead to oil spills (1) which can kill local wildlife (1).</li> <li>• Burning fossil fuels can lead to air pollution (1) which can lead to environmental impacts such as acid rain (1).</li> <li>• Nuclear power plants can have leaks in earthquakes/tsunami (1) causing radiation poisoning to animals/fish in local environment (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(4)</b>

Question number	Indicative content	
1 (h)	<p style="text-align: center;"><b>AO3 (4 marks)/AO4 (4 marks)</b></p> <p><b>Marking instructions</b></p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p><b>Indicative content guidance</b></p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p><b>AO3</b></p> <ul style="list-style-type: none"> <li>Strategies to reduce an individual carbon footprint can be taken to address different activities in daily lives.</li> <li>There are different types of strategies to make energy use more sustainable:</li> <li>Some strategies to make energy use can involve energy conservation, reduction in energy use, or creation of green energy <ul style="list-style-type: none"> <li>Energy conservation and improving efficiency: through draft-proofing building to reduce heat losses through doors and windows.</li> <li>Consumption choices in other areas of life such as food can have an impact on broader energy consumption. Choosing to buy food from local sources can reduce fuels and food miles.</li> <li>Sustainable use of energy can also relate to the type of energy being used. Installing solar panels are an option for some households, although initial costs are relatively high so not necessarily accessible for everyone.</li> </ul> </li> <li>Some strategies have an immediate impact on sustainable energy use (i.e. reducing thermostat to save energy used in the household), compared to shopping second hand which saves energy in terms of the reduced need for new materials.</li> </ul> <p><b>AO4</b></p> <ul style="list-style-type: none"> <li>Figure 1c shows strategies people can take to make their energy use more sustainable.</li> <li>On Figure 1c it can be seen that some actions relate to the generation of renewable energy, which is more sustainable, such as solar power.</li> <li>Figure 1c shows that some ways to use energy more sustainably relate to consumer choices for example choosing to buy local food (reducing transport fuels), shopping second hand (reducing production of new materials).</li> <li>Figure 1c shows there are strategies that can be used to address different areas of energy consumption in peoples live (energy, transport and food).</li> </ul>	
Level	Mark	Descriptor
	0	No rewardable material.
<b>Level 1</b>	<b>1–3</b>	<ul style="list-style-type: none"> <li>Attempts to apply understanding to deconstruct information but understanding and connections are</li> </ul>

		<p>flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3)</p> <ul style="list-style-type: none"> <li>• Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)</li> </ul>
<b>Level 2</b>	<b>4–6</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)</li> </ul>
<b>Level 3</b>	<b>7–8</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)</li> </ul>

Question number	Answer	Mark
2(a)(i)	<p>C Opening a farm shop (1)</p> <p>The answer cannot be A, B or D as these are not types of farm diversification.</p>	(1)

Question number	Answer	Mark
2(a)(ii)	<p><b>AO1 (1 mark)</b></p> <p>Award 1 mark for suitable reason.</p> <ul style="list-style-type: none"> <li>To increase yield. (1)</li> <li>To increase resistance to pests/reduce loss from pests (1)</li> <li>To have crops that are more tolerant of changing climate (1).</li> <li>To increase tolerance to herbicides (1)</li> <li>To grow crops faster (1)</li> </ul> <p>Accept any other appropriate responses.</p>	(1)

Question number	Answer	Mark
2(b)	<p><b>AO1 (1 mark)</b></p> <p>A Farming which uses large amounts of resources and labour (1)</p> <p>The answer cannot be B, C or D as these are not definitions of intensive farming. B is organic farming and D is subsistence farming.</p>	(1)

Question number	Answer	Mark
2(c)	<p><b>AO2 (1 mark) / AO3 (1 mark)</b></p> <p>Award 1 mark for identification of reason (AO2) and a further 1 mark for extension through explanation linked to the resource (AO3), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> <li>Temperature can affect where plants can grow (1) leading to deserts being located in areas of high temperature (1).</li> <li>Latitude/distance from the equator as this affects sunlight (1) leading to lots of forests around the equator (1).</li> </ul>	

	<ul style="list-style-type: none"> <li>Climate as this determine the type of ecosystem that can survive (1). Warm and humid climates support forest development across central Africa (1).</li> </ul> <p>Accept any other appropriate responses.</p>	<b>(2)</b>
--	--	------------

<b>Question number</b>	<b>Answer</b>	<b>Mark</b>
<b>2(d)</b>	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>Award 1 mark for a suitable characteristic:</p> <ul style="list-style-type: none"> <li>High precipitation / 750-2,400mm (annual rainfall) (1) Accept within this range.</li> <li>High humidity (1)</li> <li>Deciduous trees (1)</li> <li>Four distinct seasons (1)</li> </ul> <p>Accept any other appropriate response.</p>	<b>(1)</b>

<b>Question number</b>	<b>Answer</b>	<b>Mark</b>
<b>2(e)</b>	<p style="text-align: center;"><b>AO2 (2+2 marks)</b></p> <p>Award 1 mark for identification of a service provided by natural ecosystems and a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> <li>Pollination (1) as ecosystems such as forests, act as habitats for pollinating insects (1).</li> <li>Purification of water and air (1) through photosynthesis (1).</li> <li>Increased flood protection (1) as trees can intercept rainfall / roots can absorb water from rainfall (1) .</li> <li>Climate regulation (1) through processes such as evapotranspiration (1).</li> <li>Mangroves can protect against coastal erosion (1) by providing a natural barrier (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(4)</b>

Question number	Answer	Mark
2(f)	<p style="text-align: center;"><b>A01 (1 mark) / (A03) 2 marks</b></p> <p>Award 1 mark for an identification of a pattern and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> <li>Rise in yields is higher than the land used (1) this could be due to increased use of fertilisers (1) as the amount of land used has not grown as much, and this would lead to a higher yield of crops (1).</li> <li>Yields rise faster than land use (1). This could be due to increased mechanisation in farm processes (1) as this would allow higher yields without having to use a lot more land (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(3)</b>

Question number	Answer	Mark
2(g)	<p style="text-align: center;"><b>A02 (4 marks)</b></p> <p>Award 1 mark for initial explanation of how an NGO has tried to manage environmental challenges and an additional 1 mark for development through further explanation or exemplification, up to a maximum of 2 marks for each. A range of countries and strategies could be chosen. For example:</p> <p>Kenya:</p> <ul style="list-style-type: none"> <li>NGO - Practical Action have been trying to reduce poverty through supporting agricultural programmes (1) which equip farmers with skills to increase their food production (1).</li> <li>WaterAid - Using funds to improve the water infrastructure in rural areas (1) so people have clean drinking water supplies (1).</li> </ul> <p>Indonesia:</p> <ul style="list-style-type: none"> <li>Jendela Desa supported poverty reduction in rural areas (1) through increasing access to education in remote areas (1).</li> <li>NGO - established a project to enhance women's involvement in community development (1) this enabled greater participation of more local people in the issues that affected particular villages (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(4)</b>

Question number	Indicative content	
2 (h)	<p style="text-align: center;"><b>AO3 (4 marks)/AO4 (4 marks)</b></p> <p><b>Marking instructions</b> Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p><b>Indicative content guidance</b> The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p><b>AO3</b></p> <ul style="list-style-type: none"> <li>• The negative multiplier effect can occur in rural areas where there is lack of investment or a reduction in spending in a particular area.</li> <li>• This kickstarts a process that leads to increased deprivation in an area, usually coupled with fewer jobs and increasing unemployment. For those with reduced income there is less money to spend in the area. While some people may be able to move out of the area, others may not have the means to do so.</li> <li>• As more people leave and there is less money spent in the area this leads to further decline.</li> <li>• While the extent of the decline may be affected by the size and composition of the area, the process is kickstarted by a reduction in income or investment somewhere in the area.</li> </ul> <p><b>AO4</b></p> <ul style="list-style-type: none"> <li>• Figure 2c shows some of the different components of the negative multiplier effect.</li> <li>• Figure 2c indicates the downward spiral of the negative multiplier effect is prompted by lack of money in a particular area which leads to a series of knock-on effects to individuals and the places where they are located.</li> <li>• Figure 2c shows how the loss of money can lead to greater unemployment, which can lead to people leaving the area, and this leads to reduced services, which then leads to more people leaving.</li> </ul>	
Level	Mark	Descriptor
	0	No rewardable material.
<b>Level 1</b>	<b>1–3</b>	<ul style="list-style-type: none"> <li>• Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3)</li> <li>• Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)</li> </ul>

<b>Level 2</b>	<b>4–6</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)</li> </ul>
<b>Level 3</b>	<b>7–8</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)</li> </ul>

Question number	Answer	Mark
3(a) (i)	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>B - Increased network of cycle lanes (1)</p> <p>The answer cannot be A, C or D as these are not strategies which would make cities more sustainable. A would increase traffic and C and D relate to wider quality of life but not sustainability.</p>	<b>(1)</b>

Question number	Answer	Mark
3(a)(ii)	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>Award 1 mark for any suitable reason.</p> <ul style="list-style-type: none"> <li>• They can include green spaces in their city plans(1)</li> <li>• They can create plans for affordable housing schemes(1).</li> <li>• They can support regeneration of areas (1).</li> <li>• Communication with law enforcement (1).</li> </ul>	<b>(1)</b>

Question number	Answer	Mark
3(b)	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>D employment (1)</p> <p>The answer cannot be A or C as these are impacts of urbanisation, or B which is not a factor that can lead to urbanisation.</p>	<b>(1)</b>

Question number	Answer	Mark
3(c)	<p style="text-align: center;"><b>AO2 (1 mark) / AO3 (1 mark)</b></p> <p>Award 1 mark for basic evidence from the resource (AO3) and a further 1mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> <li>• There is a lot of commercial space (1) which may be due to the land values (1).</li> <li>• There are some residential areas (1) as there are good transport connections via road/rail (1).</li> <li>• High land values (1) means only retail and offices are generally only located in the centre (1).</li> </ul> <p>Accept any other appropriate response</p>	<b>(2)</b>

Question number	Answer	Mark
3(d)	<p style="text-align: center;"><b>AO1 (1 mark)</b></p> <p>Award 1 mark for a suitable area identified.</p> <ul style="list-style-type: none"> <li>• Rural-urban fringe (1)</li> <li>• Urban fringe (1)</li> <li>• Suburban fringe (1)</li> <li>• Edge of the city (1)</li> </ul>	<b>(1)</b>

Question number	Answer	Mark
3(e)	<p style="text-align: center;"><b>AO2 (2+2 marks)</b></p> <p>Award 1 mark for an advantage and a disadvantage, with a further mark for expansion mark, up to a maximum of 2 marks each.</p> <p>Advantage</p> <ul style="list-style-type: none"> <li>• There is often more land available (1) which would allow for a better-quality house to be built (1).</li> <li>• There may be better access to major roads for residents (1) which may support their ability to travel to other areas (1).</li> <li>• Improved quality of life for residents (1) due to lower levels of air pollution (1).</li> <li>• Reduces housing pressure on the city centre (1) supporting growth of the population for local jobs (1).</li> </ul> <p>Disadvantage</p> <ul style="list-style-type: none"> <li>• This can lead to building on greenfield sites (1) which can damage local biodiversity (1).</li> <li>• There may be resistance from local residents (1) which may lead to conflicts (1).</li> <li>• May lead to urban sprawl (1) as housing estates expand the amount of land used for residential purposes (1).</li> <li>• Loss of agricultural land (1) which can lead to loss of jobs (1).</li> <li>• Long way from CBD where many people work (1) inconvenient to commute therefore/doesn't match sustainability principles of new builds (1).</li> </ul> <p>Accept any other appropriate response.</p>	<b>(4)</b>

Question number	Answer	Mark
3(f)	<p><b>A01 (1 mark) / (A03) 2 marks</b></p> <p>Award 1 mark for an identification of a trend and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> <li>• There has been a significant increase in the percentage of urban populations (1) this could have been driven by availability of jobs in the cities (1) which caused rural-urban migration (1).</li> <li>• There has been a rapid increase in urban populations since 1900 (1) caused by rural-urban migration (1) which has been driven by industrialisation in many countries during this time period (1).</li> </ul> <p>Accept any other appropriate response.</p>	(3)

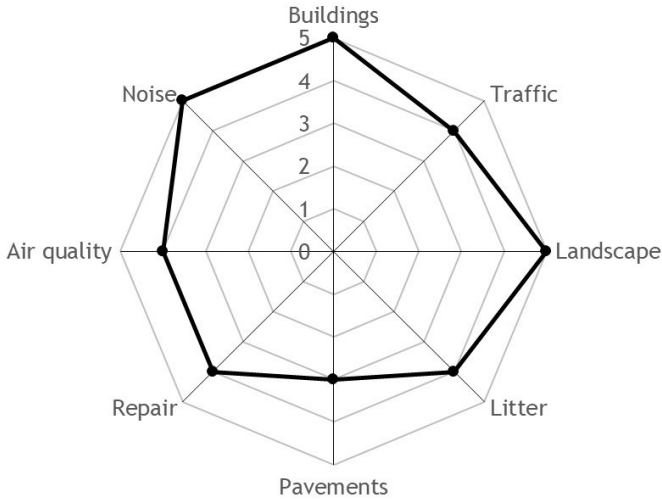

Question number	Answer	Mark
3(g)	<p><b>A02 (4 marks)</b></p> <p>Award 1 mark for initial explanation and an additional 1 mark for development through further explanation or exemplification. Maximum of 2 marks when no named developed.</p> <p>A range of countries and examples could be chosen, relating to a range of challenges which could include: congestion, transport, employment, or environmental issues.</p> <ul style="list-style-type: none"> <li>• Nigeria: <ul style="list-style-type: none"> <li>◦ Lagos experiences high level of congestion (1) due to a rapid increase in the number of personal vehicles (1).</li> <li>◦ In Lagos there have been shortages in drinking water (1) due to rapid increase in demand which the existing infrastructure cannot manage (1).</li> </ul> </li> <li>• Bangladesh: <ul style="list-style-type: none"> <li>◦ Lack of waste management supplies in Dhaka (1) have led to disposal of waste into local water bodies which can led to contamination (1).</li> <li>◦ Shortage of housing in cities like Dhaka (1) can lead to the growth of informal settlements (1).</li> </ul> </li> </ul> <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content	
3 (h)	<p style="text-align: center;"><b>AO3 (4 marks)/AO4 (4 marks)</b></p> <p><b>Marking instructions</b> Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p><b>Indicative content guidance</b> The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p><b>AO3</b></p> <ul style="list-style-type: none"> <li>• Development of brownfield sites is common in many cities due to shortages of space, and the need to redevelop areas for different purposes. E.g. decline of motor industry in the US has led to many cities needing to regenerate areas which have experienced decline.</li> <li>• Brownfield sites are typically associated with reduced loss of the countryside, and land use that would be used for other purposes such as agriculture.</li> <li>• Benefits of building on brownfield sites include that it can lead to regeneration and revival of urban areas (as seen in the London Docklands). This also reduced the need to build on greenfield sites, which can reduce urban sprawl.</li> <li>• There are however drawbacks of building on brownfield sites. If the site is contaminated for example, then it can be expensive to treat the land to make it suitable for construction for new purposes.</li> </ul> <p><b>AO4</b></p> <ul style="list-style-type: none"> <li>• Figure 3c shows how different brownfield sites have been developed into new sites in the United States.</li> <li>• Figure 3 shows how there is potential for transformation for sites such as old houses, abandoned factories and polluted sites into new buildings, gardens or leisure areas.</li> <li>• Figure 3c shows how brownfield sites can be repurposed for various commercial and leisure purposes.</li> <li>• Figure 3c shows how the use of brownfield sites has the potential to have economic, social and environmental impacts.</li> </ul>	
Level	Mark	Descriptor
	0	No rewardable material.
<b>Level 1</b>	<b>1–3</b>	<ul style="list-style-type: none"> <li>• Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3)</li> <li>• Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)</li> </ul>

<b>Level 2</b>	<b>4–6</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)</li> </ul>
<b>Level 3</b>	<b>7–8</b>	<ul style="list-style-type: none"> <li>• Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3)</li> <li>• Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)</li> </ul>

Question number	Answer	Mark
4(a)(i)	<p style="text-align: center;"><b>A03 (1 mark)</b></p> <p>Award one mark for a suitable type of secondary data.</p> <ul style="list-style-type: none"> <li>• Data on local population demographics (1).</li> <li>• Local planning reports (1).</li> <li>• Local newspaper articles (on energy issues) (1)</li> <li>• Data from social media (1).</li> <li>• Maps (1)</li> <li>• Data from previous fieldwork (1)</li> </ul> <p>Do not allow general data sources such as 'the internet' or 'textbooks'.</p>	<b>(1)</b>

Question number	Answer	Mark
